We recognise the importance of providing a website that is accessible to all user groups, including those with a disability or impairment. Wherever possible, we have included simplified features to make our content available to anyone who is using assistive technology or might otherwise find the standard features difficult to use.

We aim to provide full accessibility to all content on our website, but please note some older pages may not yet be compatible with all accessibility features. In addition, third-party content, eg other websites we provide hyperlinks to, may not be as accessible as our website.

Help or feedback

We are committed to ongoing accessibility improvements.

If you would like to give us some feedback, or are having difficulty accessing this website for any reason, please let us know and we will do our best to resolve the issue.

You can contact us by email: generiscorporate.co.uk

Accessibility features

We have included a number of features to improve usability and accessibility.

Sitemap

A sitemap is available within our website. This provides an overview of all content in this website and is fully hyperlinked to assist with navigation.

Home and search links

All pages have home and search links to aid navigation in text-only browsers.

Keyboard navigation

All links and user interfaces are designed to be navigable with a keyboard.

- [press **SHIFT** and **TAB** to navigate to the previous link]

- [press **ENTER** to follow a link]

Access keys

Our website uses access keys to help assist you with navigation. These can be accessed in the following way:

- if you are using a PC—hold down the **ALT** key

- if you are using a Mac—hold down the **CTRL** and the **ALT** key

Then press one of the keys listed below: [insert details of the specific access keys for your website, eg]

- [[Home page—0]

All content images used in this website include alternative descriptions.

Colours

You can import your own stylesheet within your browser preferences to override the website's colours.

Text or page resizing

You can generally change the font size or adjust the page zoom through your browser. To enable this feature on:

- a PC, hold down the **CTRL** key and press the **+** key to increase and the **—** key to decrease the font size

- a Mac, hold down the **COMMAND** key and press the **+** key to increase and the **—** key to decrease the font size

Compatibility with tools

This website aims to be compatible with recent versions of the following screen readers:

- [[insert details of any compatible screen readers,eg, JAWS]

- [VoiceOver]

- [Window Eyes]]
